PROFILE

Driven Artificial Intelligence student with hands-on internship experience developing automated model lifecycle and governance workflows. Combines practical experience in automation and image classification with academic training in exploratory data analytics. Applies strong critical thinking and problem-solving skills to build practical software solutions tailored to business requirements.

EXPERIENCE

Pointstar Malaysia

Sept 2025 - Nov 2025

WSG Delivery Intern

- Developed an **automated model governance system** using **Google Cloud Platform (GCP)** technologies, scraping and tracking model lifecycle data across 20+ models to eliminate manual tracking.
- Engineered a **web scraping algorithm** using **Google Apps Script** to convert model lifecycle information from the Gemini Model official website to a designated Google Sheet.
- Architected a **logic-driven deprecation alerting system** that computes model retirement timelines using **Google AppSheet**.
- Implemented **webhook technologies** for **automated alert dispatch** to Google Chat spaces, preventing operational downtime from unexpected model retirement.

PROJECTS

Employee Resignation Analysis

- Engineered a data preprocessing workflow to clean a 2,000-record human resources dataset by standardizing fragmented qualitative metrics and resolving missing data via k-Nearest Neighbors (kNN) imputation.
- Diagnosed abnormal attrition spikes by engineering multi-layered visualizations to uncover hidden structural workload imbalances, overtime dependencies, and base pay vulnerabilities.
- Designed cross-tabulated diagnostic heatmaps to evaluate the interacting and compounding attrition risks across various relative factors.

Anti Scam Malaysia - AI-Powered Scam Detection Platform

(AWS Cendekiawan Finalist | Collaborative Team Project)

- Architected a full-stack, AI-powered fraud detection platform that analyses suspicious messages, URLs, and media for scam indicators using AWS Bedrock and custom safety guardrails.
- Engineered an automated 4-stage redaction pipeline to sanitize sensitive PII (financial data, national IDs, contact info) from multimodal inputs prior to model inference.
- Built a secure, scalable backend using FastAPI and AWS services (RDS PostgreSQL, S3, Secrets Manager) with JWT authentication to handle real-time analysis requests.
- Designed a responsive React interface offering real-time risk scoring, interactive scam simulations, bilingual downloadable reports, and an anonymous threat-sharing community feed.

Dog Image Classification

- Built an end-to-end image classification pipeline that automatically extracts ground-truth pet labels from raw filenames (lowercasing, underscore splitting, and alphabetic filtering).
- Evaluated three pre-trained CNN architectures (ResNet, AlexNet, and VGG) using PyTorch/Torchvision to classify dog breeds and detect dogs vs. non-dogs.
- Engineered custom statistical functions to calculate key metrics (correct label match rate, dog detection accuracy, breed classification accuracy, and non-dog detection accuracy) and benchmarked models on accuracy vs. runtime.

EDUCATIONS

Bachelor of Computer Science (Artificial Intelligence) (Hons)

Feb 2026 - Present

Asia Pacific University

- CGPA: 3.88
- TOP 20 Finalist in AWS Cendekiawan Competition

Diploma in Information & Communication Technology Specialism in Software Engineering

Aug 2023 - Nov 2025

Asia Pacific University

- Achieved a final CGPA of 3.84 (Distinction classification)
- Demonstrated proficiency in core modules including Artificial Intelligence, Object-Oriented Programming, Networking Technologies (CISCO), and Database Management.
- Successfully completed a Capstone Project and an industrial internship, alongside competitive software development participation in Hack Attack 2.0 Hackathon.

Sijil Pelajaran Malaysia (SPM)

2018 - 2023

Sekolah Menengah Kebangsaan Pusat Bandar Puchong (1)

- Achieved 8As, 2Bs

ACHIEVEMENTS AND CERTIFICATIONS

- AWS Cendekiawan Finalist (Top 20) | April–May 2026
- Participant – Hack Attack 2.0 Hackathon
- AWS AI Practitioner Challenge | May 2026

SKILLS

Programming Tools and Technologies

- Python
- Java
- HTML5, CSS, JavaScript, and PHP
- R
- Github

Soft skills

- Problem Solving
- Team Communication
- Critical Thinking
- Team Collaboration
- Leadership

LANGUAGES

- English: Proficient
- Malay: Proficient
- Chinese: Native
